

CCG Focus-on Breakfast Event: Defects

Dear Colleague

We are delighted to invite you or a company representative to our first Focus-on breakfast event which will take place on 11 May 2016, 9.00 – 10.30am.

The topic for discussion will be defects. It is widely acknowledged that between 1 and 5% of project costs are attributed to defects, resulting from client change, inadequate design and poor workmanship, both during construction and once assets are put into operational use. This leads to cost overruns and poor value and quality for all concerned.

The event will be a fantastic opportunity for you to network and share best practice on your company's approach to defects and to also understand how other leading clients deal with them.

This free event will be held at Constructing Excellence, 4th Floor, 33 Cannon Street, London EC4M 5SB and will be chaired jointly by Gary O'Brien, CCG and Daniel Keeling, CQI. Refreshments will be provided.

To book onto the event, please RSVP Gary O'Brien at gary.obrien@constructingexcellence.org.uk by 28 April 2016.
